## **Table of Contents**

roreworu to	the Second Edition
Foreword to	o the First Edition
Preface	li
Acknowledg	gments
Nomenclatu	re lvii
Chapter 1.	Introduction
1.1	Propulsion
1.2	Units and Dimensions
1.3	Operational Envelopes and Standard Atmosphere
1.4	Airbreathing Engines
1.5	Aircraft Performance
1.6	Rocket Engines
	Problems
Chapter 2.	Review of Fundamentals 65
2.1	Introduction
2.2	Equations of State and Conservation of Mass 65
2.3	Steady Flow Energy Equation
2.4	Steady Flow Entropy Equation
2.5	Steady Flow Momentum Equation
2.6	Perfect Gas
2.7	Compressible Flow Properties
2.8	One-Dimensional Gas Dynamics—Finite Control Volume
	Analysis and the <i>H-K</i> Diagram
2.9	Nozzle Design and Nozzle Operating Characteristics
2.10	One-Dimensional Gas Dynamics—Differential Control
	Volume Analysis
2.11	Chemical Reactions
	Problems

3.1       Introduction       161         3.2       Rocket Propulsion Requirements and Capabilities       166         3.3       Rocket Propulsion Engines       176         3.4       Types of Rocket Nozzles       189         3.5       Parameters for Chemical Rockets       194         Problems       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         4.6       Aircraft Engine Design       257         4.7       Problems       258         Chapter 5. Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       262         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       265         5.6	Chapter 3.	Rocket Propulsion	161
3.2       Rocket Propulsion Requirements and Capabilities.       166         3.3       Rocket Propulsion Engines       176         3.4       Types of Rocket Nozzles       189         3.5       Parameters for Chemical Rockets       194         Problems.       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems       258         Chapter 5.       Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       261         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       265         5.6       Ideal Turbojet with Afterburner       291         <	-		161
3.3       Rocket Propulsion Engines       176         3.4       Types of Rocket Nozzles       189         3.5       Parameters for Chemical Rockets       194         Problems.       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems       258         Chapter 5.       Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       262         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       266         5.6       Ideal Ramjet       266         5.7       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbofan wit	3.2		166
3.4       Types of Rocket Nozzles       189         3.5       Parameters for Chemical Rockets       194         Problems       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems       258         Chapter 5.       Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       261         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       266         5.6       Ideal Ramjet       266         5.7       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbofan with Optimum Bypass Ratio       325         5.11       Ide	3.3		176
3.5       Parameters for Chemical Rockets       194         Problems.       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction.       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems.       258         Chapter 5.       Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       262         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       264         5.6       Ideal Ramjet       266         5.7       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbofan with Optimum Bypass Ratio       325         5.11       Ideal Pulse Detonation Engine       341         5.12	3.4		189
Problems.       228         Chapter 4.       Aircraft Gas Turbine Engine       233         4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems       258         Chapter 5.       Parametric Cycle Analysis of Ideal Engines       261         5.1       Introduction       261         5.2       Notation       262         5.3       Design Inputs       264         5.4       Steps of Engine Parametric Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       264         5.5       Assumptions of Ideal Cycle Analysis       266         5.6       Ideal Ramjet       266         5.7       Ideal Turbojet       278         5.8       Ideal Turbojet with Afterburner       291         5.9       Ideal Turbofan with Optimum Bypass Ratio       325         5.11       Ideal Turbofan with Optimum Byass Ratio       332         5.12 <t< td=""><td>3.5</td><td></td><td>194</td></t<>	3.5		194
4.1       Introduction       233         4.2       Thrust Equation       233         4.3       Note on Propulsive Efficiency       243         4.4       Gas Turbine Engine Components       244         4.5       Brayton Cycle       252         4.6       Aircraft Engine Design       257         Problems       258         Chapter 5.
